

Will you lead the way in "mending hearts" and saving lives?

The Humane Society of Tampa Bay needs your help to raise the much needed funds to save the lives of dogs who come to our shelter and are heartworm positive. Without this treatment, the illness is terminal. In order to treat heartworms, each dog must receive lab work, 3 injections of Diroban, pain medication, antibiotics and Tri-Heart. (American Heartworm Society recommendation)

The average cost of treating a heartworm positive dog is \$700 per dog. On average, we care for 50 heartworm positive dogs per month. How many lives will you help us save?
